PROFESSIONAL SUMMARY

Senior Test Automation Engineer / SDET with 5+ years of experience designing scalable UI and API automation frameworks using Playwright, Selenium, TypeScript, Python, and CI/CD pipelines. Proven expertise in AI-assisted testing, leveraging GenAI tools including OpenAI API, Claude Code, and Cursor to accelerate test creation, improve automation coverage, and enhance exploratory testing. Experienced in building maintainable automation architectures, integrating quality gates into GitHub Actions, Jenkins, and Azure DevOps, mentoring engineering teams, and driving shift-left testing practices in Agile environments.

TECHNICAL SKILLS

Languages	Python, JavaScript/TypeScript, SQL
Automation	Playwright, Selenium WebDriver, Pytest, Cucumber (BDD), Postman, Newman, GraphQL
AI & DevOps	Claude Code, Cursor AI, OpenAI API, GitHub Actions, Jenkins, Azure DevOps, Docker, Git
Testing	UI, API, Regression, Cross-browser, Performance, Load, Shift-Left Testing, Agile/Scrum

WORK EXPERIENCE

Test Automation Engineer

Dubizzle Labs, Karachi

Dec 2025 - Present

- Designed and maintained AI-assisted automation workflows using Claude Code, Cursor AI, and prompt engineering techniques to accelerate automation development, improve framework quality, and enhance engineering productivity.
- Developed and maintained 500+ Playwright end-to-end automation tests across six business verticals, increasing automation coverage from 50% to 65% while improving regression reliability.
- Led Shift-Left testing initiatives by mentoring 15+ developers and QA engineers on Playwright automation, test design, and automation best practices, enabling engineering teams to own automated testing.
- Performed root-cause analysis of regression failures by analyzing test execution data, collaborating with engineering teams, and implementing application testability improvements to increase automation stability.
- Designed and developed a QA Health Dashboard within the AI Testing Hub, providing Engineering Managers and leadership with real-time visibility into regression health, automation quality, and release readiness across multiple business verticals.
- Implemented historical quality metrics including 30-day regression trends, pass-rate tracking, vertical health scores, and regression analytics, enabling data-driven quality decisions and faster identification of unstable product areas.

Test Automation Engineer

Fantastic Health, Remote

Oct 2024 - July 2025

- Designed and developed a Selenium WebDriver automation framework using Python and Pytest with Page Object Model (POM) architecture, improving automation coverage by 40% and reducing manual testing effort by 50%.
- Built reusable and modular automation components to support scalable cross-browser and cross-device UI regression testing, improving framework maintainability and test reliability.
- Executed functional, UI, regression, and responsive testing across desktop and mobile platforms, collaborating with developers and designers to identify, prioritize, and resolve product defects.

Senior QA & Testing Engineer

Astera Software, Karachi

June 2021 - Feb 2024

- Led end-to-end QA for customized Trigger-based CDC across SQL Server, MySQL, and Oracle providers, improving change data tracking accuracy by 99%.
- Designed and executed functional, regression, and integration testing across SQL, NoSQL, Big Data, file system, and cloud storage connectors, ensuring 100% requirements validation.
- Automated QA operations using Python and Azure DevOps, including automation of 6,000+ work items and 1,000+ workflows/dataflows, significantly reducing manual effort.
- Collaborated on Azure DevOps build pipeline optimizations, helping reduce Windows software build execution time from 45 minutes to 15 minutes.
- Performed root-cause analysis of 100+ customer-reported production issues through debugging, SQL analysis, and cross-functional collaboration.
- Mentored new QA engineers and collaborated with Product Managers, Developers, and UI/UX teams to improve testability and product quality.

EDUCATION

Institute of Business Administration

BS Computer Science

Karachi, Pakistan

Aug 2017 - June 2021
